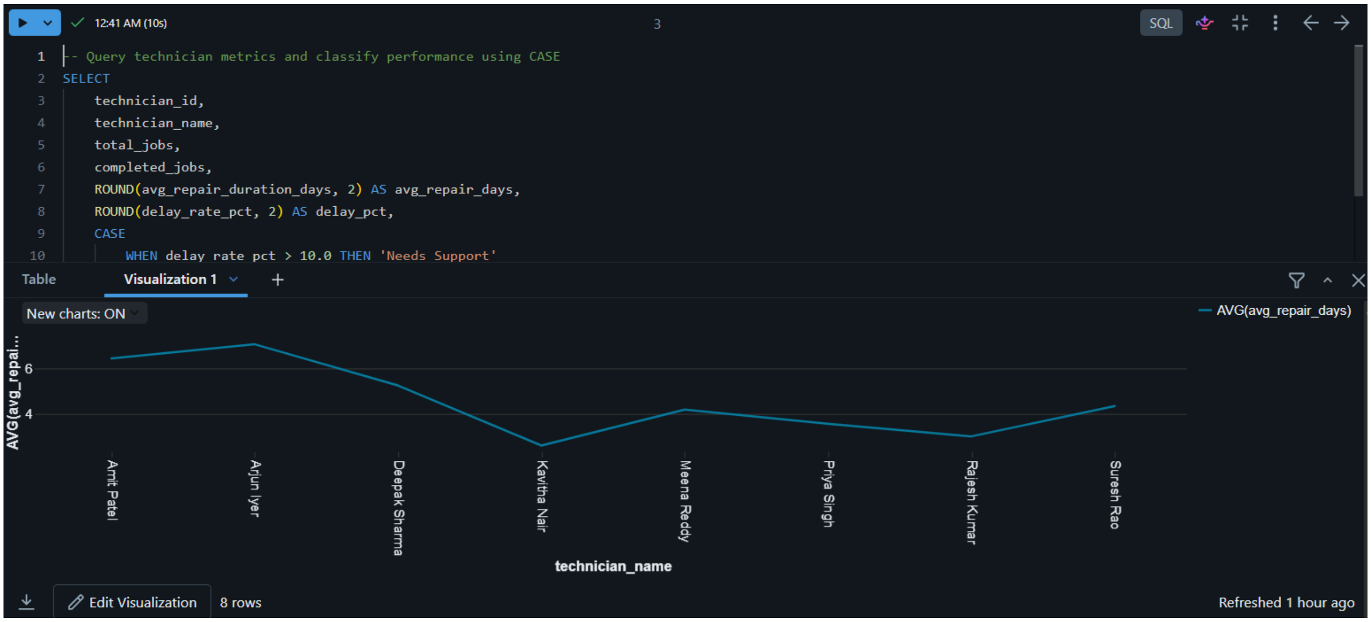
SQL Analytics — Business Query & Reporting Layer

ServiceTrack Project | Execution Screenshots

Screenshot 1: Query 1 - Technician Efficiency Analysis (with Chart)



SQL query using CASE to classify each technician as 'Needs Support' or 'Optimal Performance', visualized as a line chart of average repair days per technician.

Screenshot 2: Query 2 - Repeat Customer Issue Trends

Just now (3s)

SQL

```sql
-- Find the count of repeat occurrences by issue category
SELECT
    issue_type,
    COUNT(customer_id) AS repeat_customer_count,
    SUM(visit_count) AS total_visits
FROM gold_repeat_customers
GROUP BY issue_type
HAVING SUM(visit_count) > 3
ORDER BY total_visits DESC;
```

Table

	issue_type	repeat_customer_count	total_visits
1	Software Crash	23	49
2	Charging Port Fault	20	48
3	Water Damage	20	41
4	Wi-Fi Not Connecting	18	41
5	Screen Damage	17	35
6	Power Not Turning On	16	35
7	Keyboard Fault	16	34
8	Overheating	16	32
9	RAM Issue	12	29

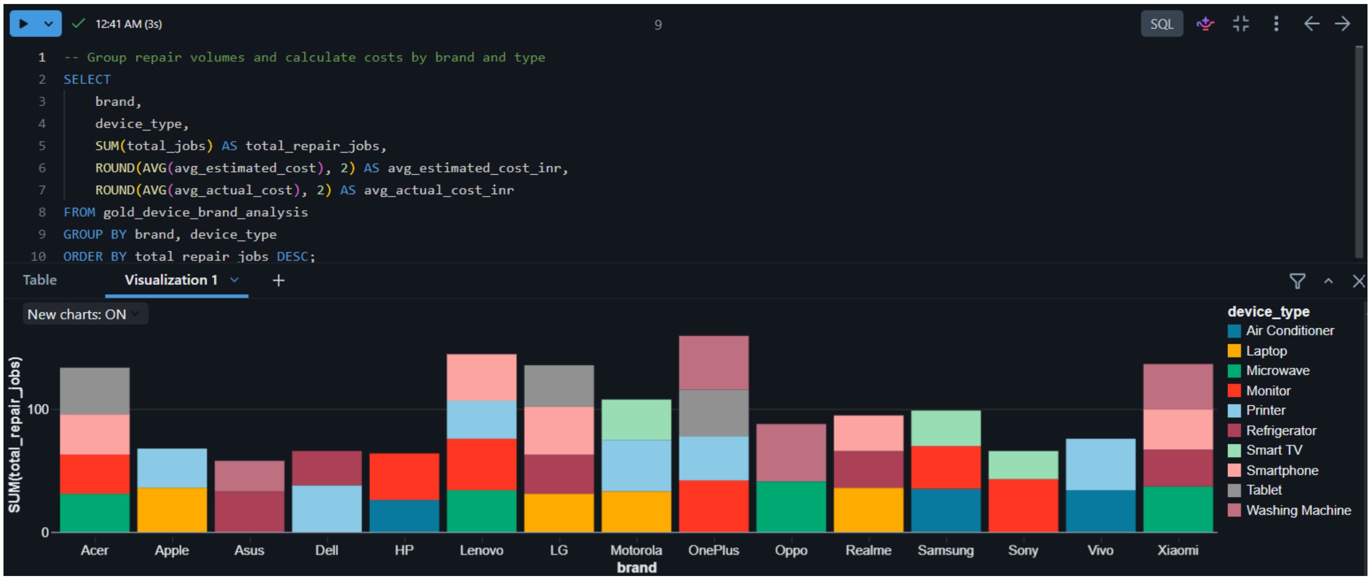
Refreshed now

SQL query using GROUP BY and HAVING to find issue categories with the highest repeat-visit counts.

Screenshot 3: Query 3 - Service Delay Performance (with Chart)

SQL query reporting overall business-wide delay metrics, visualized as a big-number card showing the overall business delay rate (19.8%, rounded to 20%).

Screenshot 4: Query 4 - Repair Volume & Costs by Brand and Category (with Chart)



SQL query showing total repair job volume by brand and device type, visualized as a stacked bar chart broken down by device type.

Screenshot 5: Query 5 - Customer Latest Visit Details using CTE

5 minutes ago (3s)

```sql
-- Query latest customer interaction using ROW_NUMBER and CTE on Silver layer
WITH RankedJobs AS (
    SELECT
        job_id,
        customer_id,
        customer_name,
        received_date,
        job_status,
        actual_cost,
        ROW_NUMBER() OVER (PARTITION BY customer_id ORDER BY received_date DESC, job_id DESC) as rn
    FROM silver_enriched_jobs
)
SELECT
    customer_id,
    customer_name,
```

Table

	customer_id	customer_name	latest_job_id	latest_visit_date	latest_status	cost
1	CUST0285	Pooja Iyer	JOB01133	2024-03-21	Completed	8633.8
2	CUST0082	Madhu Verma	JOB01310	2024-03-21	In Progress	null
3	CUST0121	Nisha Bajaj	JOB00101	2024-03-21	Completed	7361.5
4	CUST0099	Tanvi Iyer	JOB00655	2024-03-21	Cancelled	null
